

University of North Carolina Pembroke
College of Arts and Sciences Web Video Script
April 1, 2009
FINAL TRANSCRIPT

Begin with several shots around campus..the clock tower, fountain, the big bldg. with UNC-P written on side, the shot of Old Main, etc.

Aaron -When I came to UNC Pembroke I kind of fit in and realized that this place is right for me

Rhonda - They want you to figure out what you're good at and what kind of job can you actually get with whatever you're good at.

QUICKLY MOVE THRU SIGNAGE FOR ALL DEPARTMENTS; signage will be a collage of different colors and fonts

All department signs –

Art Department

Philosophy and Religion

Cut to entire group saying: We are the College of Arts and Sciences at UNC-P!
Screen also shows university logo and words “College of Arts and Sciences”

I'm Aaron, mass communication major in the college of arts and sciences

B-ROLL OF AARON ACTING AS SPORTS ANCHOR IN STUDIO; CONTROL ROOM

Aaron - well I actually played college football a few years ago and I really had a passion for sports so when I came to UNC Pembroke and saw that they had a mass communications department I decided that I wanted to try out sports broadcasting and I fell in love with it. It's been a great opportunity here to have hands on everything, to editing labs, cameras and be able to become a reporter.

My name is Mardella Sunshine and I'm majoring in American Indian studies in the College of Arts and Sciences

B-ROLL OF SUNSHINE GIVING TOUR OF MUSEUM TO FELLOW STUDENTS

I am one of two work-study students in the Native American resource center and it's allowed me to opportunity to work with the artifacts we have in our collection. I've also been able to work on my public speaking skills through giving guided tours to the elementary students of Robeson County.

Hi I'm Kendall, and I'm an arts major in the College of Arts and Sciences

B-ROLL OF KENDALL MAKING POTTERY; ADDING WOOD TO FIRE IN KILN

Kendall - The faculty has always been really welcoming and has never hesitated to lend a hand and work with me specifically outside of class to talk about how to develop myself as an artist and where my art's going

B-ROLL OF KENDALL'S STUDY ABROAD EXPERIENCE

Kendall - I received a scholarship to study abroad in Germany summer of last year and it was by far the greatest experience of my life

Hi I'm Rhonda, and I'm a biology major in the College of Arts and Sciences

B-ROLL OF PHYSICS LAB WITH RHONDA

Rhonda - Today in my physics lab we were testing resistors, and pretty much these are things you find in cell phones and it's pretty cool that you can apply it to things you use every day.

My name is Elisha, and I'm a theatre arts major in the College of Arts and Sciences

B-ROLL OF ELISHA IN PLAY REHEARSAL

Elisha - Some of the theatre productions that I've taken part in is "Lend Me A Tenor", "Once Upon A Mattress" and "You Can't Take It With You". A professor in the theatre arts department has really helped me to see different aspects in acting not just one aspect but to be a director or to design a stage or to stage makeup. They really opened my mind to new and different things within acting.

I'm Lisa, I'm majoring in biology and chemistry and I'm in the College of Arts and Sciences.

B-ROLL OF LISA IN SAFE BOX LABORATORY

Lisa - When I came straight out of high school I met several friends as well as professors that definitely have made lifelong impressions on my life. If you are having a difficult time adjusting to their teaching style they are willing to work with you so you can adapt and be able to make that grade that you want.

My name is Yanissa, I'm an English major from the College of Arts and Sciences

B-ROLL OF YANISSA AT PLAY REHEARSAL

I think it's a benefit that I'm able to kind of dabble between the different departments. It gives me an opportunity to do something that I enjoy and love to do even though it's not my major.

PHOTOS FROM CAMPUS ACTIVITIES

Yanissa – I think it's always important to have diversity on a campus. I'm an air force brat so I grew up with meeting a lot of different people with different cultural backgrounds and so when I came to this school and I saw that there were so many types of people from so many different types of culture I really enjoyed it.

Hi, My name is Sabrina and I'm a religion and psychology major from the College of Arts and Sciences.

B-ROLL OF MOCK JURY TRIAL

Sabrina - Having a mock jury trial is very helpful alongside with a textbook or article b/c it is applied knowledge.

A mock jury trial is actually a re-enactment of a real trial or it can also be a trial that is made up by the class.

My name is Lane and I'm majoring in biology and chemistry here at the University of North Carolina Pembroke.at the College of Arts and Sciences

B-ROLL PHOTOS FROM HOUSTON TRIP

Lane - Well, one of the opportunities that I've been awarded here at UNCP being in the science department is to be able to do research for NASA. I was able to travel to Houston and fly on their zero gravity research aircraft and do several different research projects inside this aircraft.

ENDING MONTAGE OF IMAGERY

Elisha - Coming to UNCP straight out of high school was easy for me because there is a helping hand and they won't keep you hanging. They are there to help you right off the bat.

Sabrina -We can get experience outside of the classroom

Elisha -They really get me prepared and ready for the professional world

Rhonda- It's really sort of like I have a family here. Their goal is to help me achieve my goal which I think is really cool.
