The Chemistry and Physics Department offers a Bachelor of Science degree in Chemistry and a Bachelor of Science degree in Applied Physics. The Chemistry program is approved by the American Chemical Society and offers specializations within the B.S. degree program in the following areas: (1) Professional, (2) Environmental, (3) Molecular Biotechnology, (4) Pre-Health Professions, (5) Medical Technology, (6) Pre-Pharmacy, and (7) Forensic Chemistry. Students completing these programs have been successful at entering professional schools, gaining employment in government and industry, and pursuing graduate studies in chemistry.

The Chemistry and Physics Department also offers a pre-engineering program. This two-year program prepares students for entry into an engineering program at North Carolina A & T State University, North Carolina State University, and the University of North Carolina at Charlotte.

The Department cooperates with the Biology Department in offering required chemistry and physics courses for the B.S. in Science Education and the B.S. in Biology Education. The Department also cooperates with the Education Department in offering a science concentration of the B.S. in Middle Grades Education (6-9).

For students seeking a baccalaureate degree in Elementary Education, Special Education, or Physical Education, the Chemistry and Physics Department offers an Academic Concentration in Physics.

PRE-ENGINEERING PROGRAM

Pre-Engineering Program

The Department of Chemistry and Physics is able to offer a pre-engineering program to selected students. Students selected into this program complete two years of a prescribed program at UNC Pembroke. Upon successful completion of this program, these students can transfer into their junior year at one of the engineering schools mentioned below.

Admission to the program is through a formal interview with the Committee on Pre-engineering. Requests for interviews can be made any time with the departmental secretary. Additional information may be obtained from the chair of the Chemistry and Physics Department.

This two-year program prepares students for entry into an engineering program at North Carolina A & T University, North Carolina State University, and the University of North Carolina at Charlotte. However, completion of the UNCP program does not guarantee acceptance into the engineering school at one of these institutions. The student must also satisfy admission requirements for transfer students, and these usually include an acceptable grade point average. Thus, a student should know the admission requirements of the school he or she expects to attend.
