

Cisco AnyConnect VPN Client Installation Guide Using Safari

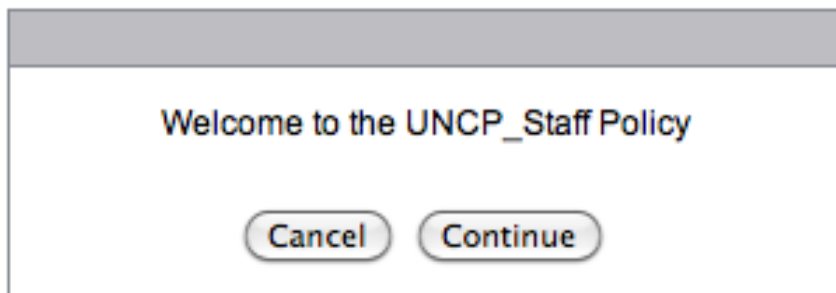

After starting Safari, enter <https://152.21.254.3> in the address bar as shown:

Next, enter your username and password. Insure that you have selected "UNCP_Staff" for "Group:".

A screenshot of the "UNCP Login" dialog box. The dialog has a dark gray header with the text "UNCP Login". Below the header, the text "Please enter your username and password." is displayed. There are three input fields: "GROUP:" with a dropdown menu showing "UNCP_Staff", "USERNAME:" with an empty text box, and "PASSWORD:" with an empty text box. At the bottom center of the dialog is a "Login" button.

After a successful login, you will see the following and click continue:

Now, you will see a dialog to install Web VPN:

The installer will then setup the VPN client software. When this is complete, you will see the following:

Congratulations! You have installed the Cisco AnyConnect VPN Client. As indicated in the screenshot above, you will be able to control the client via the System Tray icon (Windows) or the menu bar (Mac).
