### Moodle Survey - Students

As you may have heard, UNCP is considering whether to switch from Blackboard to Moodle. As part of this process the UNCP Blackboard/Open Source Committee evaluation committee would like to gain a better understanding of how Moodle is being used by UNCP students. In particular, we would like to learn more about your perceptions of Moodle vs. Blackboard.

1. How many of your classes used Moodle this semester?

Response	Average	Total
1	94%	29
2	3%	1
more than 4	3%	1
<b>Total</b>	100%	31/31

2. Was Moodle used in an Internet assisted, hybrid, or fully online class? (More than one response may be selected.)

Response	Average	Total
Assisted (less than 20% of course activity online)	3%	1
Hybrid (20-90%)	74%	23
Online (90-100%)	32%	10

The following questions ask you to compare Moodle with Blackboard. Please select N/A if you have not used Blackboard.

Stay with Blackboard	 16%	5
Switch to Moodle	 81%	25
<b>Total</b>	 97%	30/31

**14. What did you like/dislike about Moodle?**

#	Response
1	i like everything about moodle
1	It was easier to keep up with the assignments on Moodle.
1	moodle is better than blackboard, more organized, and easier to work on, nothing gets lost or sent back
1	Timer placement when taking quizzes
1	At first moodle was hard to navigate because I never used it before. But after 2 weeks I was able to catch on. But like blackboard, its like riding a bicycle. I do like that moodle is more interactive than blackboard, however I never took an online class before this one. So blackboard was previously used to transmit information from professors essentially take the place of webmail.
1	I liked the discussion board
1	I liked the Discussion boards.
1	I liked the way that moodle is set up and it is very easy to use adn the exams and powerpoints are easy to get to.

1	less interaction with professor and more with other students, with Moodle the students teach each other with blackboard the professor teaches. overall Moodle is better for test taking and online discussions compared to blackboard.
1	Moodle does not mess up as often as blackboard and I like Moodle much more.
1	moodle has more interaction with the student and professor than blackboard.
1	Not as many technical issues.
1	The exams would sometimes go blank and your time would still be running.
1	the format of the quizzes
1	The only thing that I disliked about the Moodle was that I felt like I was thrown into it. Being unfamiliar with Moodle decreased my eagerness and willingness to do the assignment, solely out of frustration. With a formal introduction to Moodle I feel like it could benefit the campus greatly.
1	The thing that I liked most about Moodle was the fact that if on a test if you got a question wrong then you were able to still get credit for that question and not receive a zero. The thing that I disliked about Moodle was that you had to rely on other students to reply to your posts and grade them. If a student did not respond to one of your posts then you did not receive credit for that post.

**15. Other comments?**

#	Response
1	There is something always wrong with blackboard and I don't like to have to take a test or do anything for that matter on it. With Moodle this year I didn't have one problem with a test or an assignment. And you can send messages to your teacher and to classmates with ease. It is all around better.
1	No additional comments
1	none

**Thank you for participating in the Blackboard/Moodle comparison!**
