

Connecting to UNCP Network – Nintendo Switch

Connecting your Device to the UNCP network involves three steps:

- ✓ Configuring your device for the UNCP network.
- ✓ Finding the device's MAC address
- ✓ Registering your device's MAC address with SafeConnect from within BraveWeb.

Step One - Configure your device for the UNCP wireless network

1. From the home screen navigate to **System Settings > Internet > Internet Settings > Search for Wireless Networks**.
2. Select **ResidentialWiFi** for the SSID > OK > Connect to the network > OK
3. Once you are connected to ResidentialWiFi the MAC address will show under connection status.

Step Two - Locate your device's MAC address

1. From the home screen, navigate to **System Settings > Internet > Internet Settings**. The MAC address will be displayed under **Connection Status**.

Step Three - Register the device's MAC address with SafeConnect

1. Register the MAC address via manual device enrollment in BraveWeb. Log in BraveWeb at braveweb.uncp.edu. Choose the **Manual Device Enrollment** link, enter your BraveWeb username and password, click "I accept the acceptable use policy" and then click submit.
2. Enter the MAC address of the game console and for device type, select **Nintendo Gaming Device**, click Enroll Device.
3. Now your device will work on UNCP network.
