Connecting to UNCP Network – VIZIO Smart TV

(Other makes of Smart TV will be similar.)

Connecting your Smart TV to the UNCP network involves the following:

✓ Connecting the device to the UNCP network.
✓ Finding the device’s MAC address.
✓ Registering your device’s MAC address with SafeConnect from within BraveWeb.

**Step One – Connecting the device to the UNCP network**

1. Connect your Smart TV to ResidentialWiFi or connect it to the wall outlet with an Ethernet Cable.

**Step Two – Locate your Smart TV’s MAC address**

1. Press the Menu button on the remote. The on-screen menu is displayed.
2. Use the Arrow buttons on the remote to highlight Network and press OK. The Network menu is displayed.
3. From the Network menu, highlight Manual Setup and press OK. The MANUAL SETUP menu is displayed.
4. Find the MAC address for the TV at the bottom of the list. The MAC address for the connection in use is displayed.

**Step Three - Register you MAC address with Safe Connect**

1. Register the MAC address via manual device enrollment in BraveWeb. Login BraveWeb at braveweb.uncp.edu. Choose the Manual Device Enrollment link, enter your BraveWeb username and password, click “I accept the acceptable use policy” and then click submit.
2. Enter the MAC address of the Smart TV and for Device Type select Media. Click Enroll Device.
