The Health Careers Club plans an annual community Easter Egg Hunt which is held at the Pembroke Recreation Complex. The year 2012 was the first year the Easter Egg Hunt was held and was a great success. The Easter Egg Hunt is a fundraiser the club sponsors for Relay for Life and club scholarship.

This year’s 2nd Annual Health Careers Club Easter Egg Hunt was scheduled to be held on March 23, 2013 once again at the Pembroke Recreation Complex. Due to inclement weather, the Easter Egg Hunt was rescheduled for the following Wednesday, March 27, 2013. The venue was changed to a local elementary school, Pembroke Elementary.

The 2nd Annual Easter Egg Hunt was still a major success thanks to the loyal Health Careers Club Members and Officers who donated their time and effort in ensuring the 2nd Annual Easter Egg Hunt went on without any interruptions.

The club had over 4,000 candy filled eggs as well as eggs that were filled with special prizes for Pembroke Elementary Students to search for. The students and the club members who participated had a wonderful time. Thanks to Pembroke Elementary School for hosting the Easter Egg Hunt.

Two of UNCP Health Career Club Members, Ronelle Hoff and Kristina Sanchez will spend an exciting summer at UNC School of Medicine in Chapel Hill, NC to participate in the Summer 2013 Medical Education Development (MED) Program.

MED is a 11-weeks program that exists to prepare pre-med and pre-dentistry students for entrance into medical and dental school. The program stuffs two years of medical and dental school academic coursework into a rigorous 11-weeks. Students take courses in medical immunology, biochemistry, histology, gross anatomy, and medical microbiology.

Kristina and Ronelle are both rising seniors here at UNCP and are both active members of the Health Careers Club. Ronelle serves as the club secretary. Congratulations and we wish you the best of luck.

What do you expect to gain from participation in the MED Program?

“Self-confidence, expand my knowledge on what is expected in medical school, learn new material that will become resourceful to me and overall gain friendships that will last a lifetime”

Kristina Sanchez
