Students and Authorized Users Enroll in Online Plans

Students and authorized users log into the Online Account Center to enroll in payment plans. Click on the Payment Plan tab and it will guide the user, step-by-step, through the enrollment process. During the process, users see details about the plan, a real-time breakdown of charges and credits, and installment due dates. Users sign a payment plan agreement form by checking an "I agree" box.

1. **New payments toward plan charges pay down one installment at a time.**
The plan looks at the balance of each plan charge to see if a payment has been made. These might be payments made inside or outside Online Account Center or might be disbursed financial aid. It totals the payments that it finds, and they pay down the plan installments in due date order.
2. **New charges are spread equally across remaining installments.**
The plan looks at the balance of each plan charge to find increased amounts. Any new charges are spread equally across the remaining plan installments.
3. **New memo or authorized aid is spread equally across remaining installments.**
The plan finds amounts for the credits you included on the worksheet and spreads them equally across the installments.
