

UNIVERSITY *of* NORTH CAROLINA

PEMBROKE

Assistant/Associate Professor Computer Science

The University of North Carolina at Pembroke invites applications for an Assistant/Associate Professor in Computer Science. The ideal candidate must have an earned Ph.D. in Information Technology, Computer Science, or a closely related field by July 31, 2019, experience in teaching or industry, research interests, and relevant on-going or planned publications. Expertise in one or more IT and CS areas (system integration, system assurance, object-oriented programming, operating system design and security, digital logic and design, human-computer interactions, video game development, mobile application development and cyber security, for example) would add to the candidate's attractiveness.

The candidate will be expected to effectively teach a variety of IT and CS courses, to advise and mentor students, and to engage in scholarship and professional service. The courses taught cover all levels of an undergraduate program in topic areas such as programming languages (Java, C++), object-oriented programming, event-driven programming, computer architecture, software engineering, web technology & security, operating system design and security, network & security, system integration, system assurance, , digital logic and design, human-computer interactions, video game development , and database management. We are particularly interested in expanding our capabilities in mobile application development and cyber security. The candidate must be able to communicate effectively through spoken, written, and visual media.

Apply through the Online Employment System at <http://jobs.uncp.edu/postings/5142>. Salary and academic rank is commensurate depending on directly related education and experience level.

Expertise in one or more IT and CS areas (system integration, system assurance, object-oriented programming, operating system design and security, digital logic and design, human-computer interactions, video game development, mobile application development and cyber security, for example)

The Search Committee will begin its formal review of candidates immediately and will continue its review until the position is filled. Candidates should attach letter of interest, current vita, copies of transcripts and reference list.

This position is subject to the successful completion of an employment background check. An employment background check includes a criminal background check, employment verification, reference checks, license verification (if applicable) and credit history check (if applicable).

In compliance with federal law, all persons hired will be required to verify identity and eligibility to work in the United States and to complete the required employment eligibility verification form upon hire.

New employees are paid only by direct deposit to the financial institution of their choice. Candidates claiming Veterans Preference must attach a copy of their DD-214 as a part of the online application process.
