

# VMWare Horizon View Setup for Personal Devices

VMWare Horizon View lets faculty, staff and students access a selection of University software from anywhere you have an Internet connection. Access requires installing a client on your device. Upon connecting, it's like sitting at a lab computer on campus.

## Usage Notes

Please save all work to an external source. Your Microsoft OneDrive or Google Drive is recommended. You can also save to your I: drive or the K: drive. Virtual desktops are not permanent storage and are **erased** after your session ends.

If your connection is dropped mid-session, you can resume your session within 30 minutes. After that, you'll be sent to a fresh desktop.

**Note:** Remember to properly sign out or shut down the virtual desktop when not in use to ensure optimal functionality for all users.

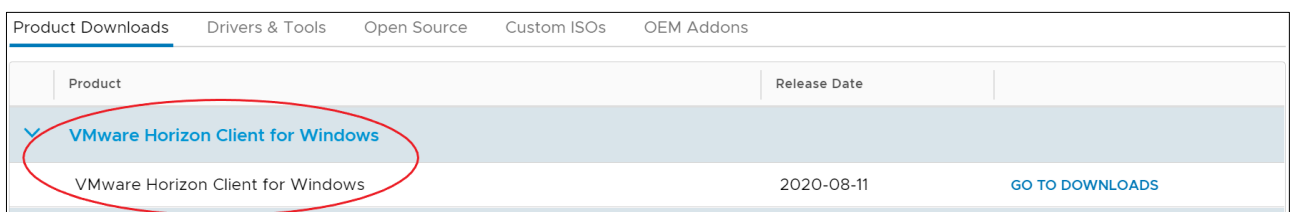

*VMWare Horizon cannot be used while connected to the UNCP network via VPN.*

## Installation Instructions for Windows and MacOS

For computer installs, we recommend downloading the installer from the VMware website. Download and install the [VMWare Horizon client](#).

### Windows Install

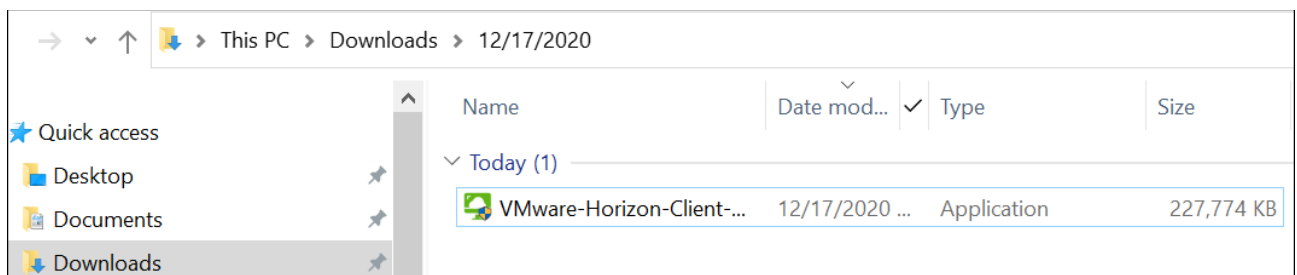

We recommend downloading the “VMWare Horizon Client for Windows” version.

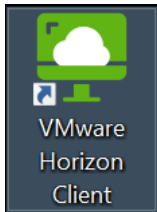

The screenshot shows the VMware website's 'Product Downloads' section. A table lists available products. The entry for 'VMware Horizon Client for Windows' is highlighted with a red circle. Below the table is a 'GO TO DOWNLOADS' link.

Product	Release Date	
VMware Horizon Client for Windows	2020-08-11	<a href="#">GO TO DOWNLOADS</a>

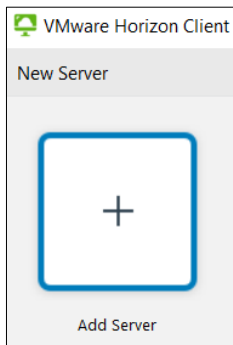

- Once downloaded, open the downloaded file.

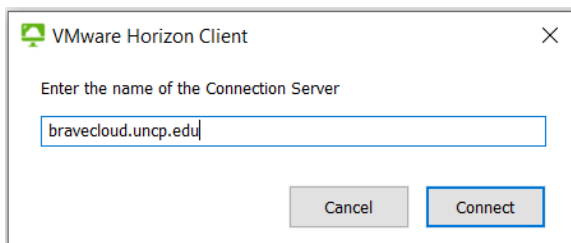

- Select "Agree and Install". When it's done installing, select "Finish".
- Open the VMWare Horizon client icon.

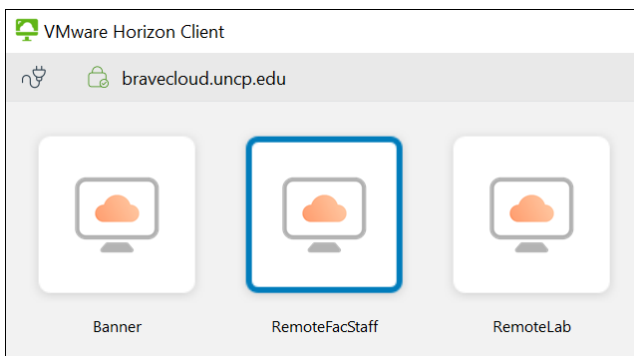

- Select "New Server".

- When asked for the Connection Server name, enter *bravecloud.uncp.edu*. Select "Connect".

- Use your UNCP username and password to log in.
- Faculty and staff select the "Banner" or "RemoteFacStaff" desktop. Students select the "RemoteLab" desktop. It will automatically log in under your profile.

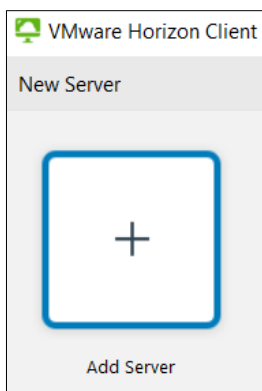

## MacOS Install

For Macs, VMWare Horizon can be downloaded and installed via the [VMWare website](#) or installed from the Apple store.

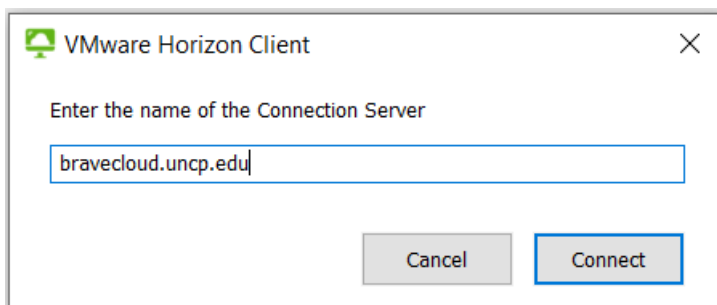

- If installing via the Apple store, search “VMWare Horizon Client”. The application is free.

Product Downloads
