BENNETT AEROSPACE INC. in Cary, NC has a unique Intern opportunity for two highly motivated college juniors, seniors or graduate students that will report directly to the President of Bennett Aerospace. Most interns report into the R&D division, so these positions will have a very high profile in the company.

Bennett Aerospace is a fast-paced advanced technology development company that creates game-changing technology for radical, positive changes to the fabric of society. To learn more about Bennett Aerospace, visit www.bennettaerospace.com.

The internship is voluntary and requires at least a full semester commitment – and applicants are selected by a highly competitive process given the number of requests we receive, so applicants that can commit to two semesters are viewed more favorably.

Why consider a volunteer-based internship? The experience you will gain is “world class” and to-date, 100% of our past interns have received job offers from companies when they graduated.

Are you ready to compete in the job market against thousands of other college graduates? If you have no professional corporate experience in your field, the answer is probably no.

We provide our interns with real-world, highly challenging projects that they are responsible for. Here are what past interns have said about their experience at Bennett Aerospace:

“Bennett Aerospace challenges their interns with real-world engineering problems placing you at the forefront of their highly advanced engineering ventures. And expects you to create a solution.”

“I really liked that at this company, I didn’t feel like I was “just the intern.” I felt more like just another engineer working on a project. This was nice because it gave me a sense of ownership and belonging. I have friends who spent the summer as a lab rat doing the bidding of older graduate students and professors. I on the other hand got a project that I had the freedom to take in almost any direction that I wanted.”

“All my engineering experience up until now has been school based, such as clubs and research. I learned a lot about how companies operate, especially DOD contractors. ... It was an opportunity to take my experiences and knowledge from school and apply it to a real world situation.”

“The duration <of the internship> gave me valuable experience with almost every facet of engineering such as research, planning, material acquisition, manufacturing, programming, testing, and presentation.”

“...the exercises in commercialization have given me a unique look into how engineering projects fit into an economic and business perspective.”

POSITION SUMMARY: The position will help increase revenue coming into the company by helping to identify, evaluate, and pursue business opportunities within the US Federal Government. Some travel (at company expense) may be required. A wide degree of creativity and latitude is expected. Aid in determining the demand for products and services offered by a firm and its competitors, and identify potential customers. Monitor competitors and ability to learn the trends that indicate the need for new products and services.

WHAT WILL I LEARN AS AN INTERN?
- You will gain an understanding of how business is conducted in the Department of Defense and other agencies.
- You will see “best in practice” methods and operations for generating new revenue in a company.
- You will work side by side on a small, highly focused team lead by the President of the company, a senior executive with 20 years of experience in the Government market.
- You will get to work in a dynamic, fast paced environment around cutting edge technology in a variety of concentrations including lasers and optics, nanoscale materials, robotics, and biosensing technology.

JOB SPECIFICATIONS/QUALIFICATIONS:
You must:
- Be highly professional.
- Be a junior, senior or graduate student at a 4 year accredited university.
- Have exceptional communication skills and no fear of calling and talking to people on the phone or in person.
- Be highly proficient in Microsoft Office Tools Suite (Word, PowerPoint, Excel, Outlook).
- Have excellent references.

Requirements:
Due to security requirements, interns must be a U.S. person (a U.S. Citizen or permanent resident (i.e. green card holder). Interns must present proof of being a U.S. person on their first day of work. Intern shall commit a minimum of 10-15 hours/week during two consecutive semesters.

Application Instructions:
Submit your cover letter, Resume and 3 professional references in PDF format ONLY via e-mail to job115@BennettAerospace.us. Writing samples are welcome. Any attachments must be in PDF format, or we will not open them due to virus concerns. No phone calls or recruiters. We will let candidates know via automated reply that we have received their resumes and will contact them if there is a good fit after the closing date for this job.
